Why is the Role Reversal so Important?

This Role Reversal is used to mark the significant zone when there is a Clean Breakout that breaks either Previous Support or Previous Resistant.

What is SR Flip?

SR Flip is a short form of Support and Resistant Flip. This is one of the Price Action that gives us the clue of how the Price behave. SR Flip is a signal of continuation of a Bearish trend.

The appearance of SR Flip is also prominent in the formation of fakeouts. In actual, the fakeouts are the SR Flip too.

How do we identify SR Flip?

We identify the SR Flip when there is a Clean Breakout of the previous support. This previous support is broken by a single Bearish candle. That is why it is called Clean Breakout.

After the Clean Breakout, the price returns to the previous support to become resistant. Support, Breakout, Resistant. A clear Role Reversal.

What is RS Flip?

RS Flip is a short form of Resistant and Support Flip. This is one of the Price Action that gives us the clue of how the Price behave. RS Flip is a signal of continuation of a Bullish trend.

Like its SR Flip sibling, the appearance of RS Flip is also prominent in the formation of fakeouts.

@Libros_Trading_Algoritmico

How do we identify RS Flip?

We identify the RS Flip when there is a Clean Breakout of the previous resistant. This previous resistant is broken by a single Bullish candle. That is why it is called Clean Breakout.

After the Clean Breakout, the price returns to the previous resistant to become support. Resistant, Breakout, Support. A clear Role Reversal.
